

**DRAYTON VALLEY/ BRAZEAU COUNTY FIRE SERVICES**  
**CROP RESIDUE MANAGEMENT BURN CHECK LIST**

This is a supplementary document that must be accompanied by a Fire Permit when a request is made to the Drayton Valley/ Brazeau County Fire Services to complete a crop residue management burn.

- Permit holder must ensure they have the necessary equipment at the burning site to create an emergent fire guard if necessary.
- Burning not permitted with winds over 15km/hr.
- The area containing the debris to be burned is surrounded completely by a guard cleared of flammable material to a width no less than 15m (50 feet).
- If ground conditions permit, a firebreak and adjacent burn area is to be cultivated to minimize the risk of re-ignition.
- A minimum of 2 adults must be present at all times during the controlled burn. Additional man-power may be required based on the hazard level.
  - \_\_\_\_\_ Number of additional man-power required to safely complete burn.
- No fires shall be lit where the smoke could cause a nuisance to adjacent towns or neighboring residences.
- Smoke signs must be placed in areas of high traffic roadways. Field officer will determine number and placement of signs that may be required.

- The permit holder is responsible for controlling the fire and may be held liable for any costs or damages it may cause.

**Fire Permit must be attached to this supplementary document to be valid.**

Due to the high risk associated with this type of burning the Fire Services will only issue a limited number of permits each day to ensure adequate resources are available to manage any potential emergencies that may arise from burning.

The Permit may be cancelled at any time.
